
ENGINEERING CHANGE NOTICE

REFRIGERANT LABEL R404A, R407C, R134a ELIMINATION – EMBRACO SLOVAKIA

Nidec Global Appliance / Embraco would like to inform its customers about elimination of additional refrigerant label R404A, R407C and R134a on all involved compressor families produced by Embraco Slovakia.

This change is in line with HFC regulations in many regions and possible alternative HFC refrigerants approvals, which were published during last years by specific ECNs and *Refrigerant Outlook* position papers.

Current label position on compressor:

Photo of eliminated labels:

Compressor models approved for flammable gases like R290, R600a, R454C, R455A and R1234yf will continue bearing additional refrigerant label together with flame warning sign.

This change will be implemented in June 2022.

Manufacturing site: Embraco Slovakia, s.r.o., Spisska Nova Ves, SLOVAKIA
